

STILL PHOTOGRAPHY/VIDEO POLICY

It is an individual settings decision as to whether still photography/video for personal use by parents will be permitted. Prior consent will be required from all parents of children participating in a particular activity, party or performance. Should any parent withhold their consent no still photography or video will be permitted. Any photographs or videoa images taken of children are for parents personal use only and are not to be placed on any social media sites such as Facebook. This is made clear to all present at the start of the event. Anyone found not complying with this rule will be asked to remove the images immediately from their online account.

Still photography/video is a Safeguarding Children issue and we have sought guidance from the Safeguarding Children Act 2006 and our Early Years consultant.
